

TEMPERATURE SENSOR ST1R

Accurate temperature sensor prepared to work in all weather conditions. The housing made of 316L stainless steel makes it also suitable for severe environment. The sensor is equipped with 1 m flexible cable.

The sensor is ideal for outdoor and indoor temperature measurement. Specially designed to be used with weather stations, environmental monitoring and smart home applications.

TECHNICAL SPECIFICATION

Type	ST1R
Working temperature	-50 ... +70°C
Accuracy	±0,5 °C
Sensing element	100kΩ NTC
Sensor dimension	ø6 x 60mm
Cable length	1 m
Ingress Protection	IP 67
